# Terms of Sale

In issuing this price list we do so with a great deal of satisfaction, because in it we are listing the largest, best and cleanest stock that we have ever grown, and can assure you even greater satisfaction than heretofore.

We can justly point with pride to our advance orders for this fall's delivery as among them appears almost all of our last season's customers who are again ordering. We thank you for your past liberal patronage and if from any cause you are dissatisfied, we would consider it a favor if you would tell us your troubles so we can assist you in rectifying them.

We are omitting the descriptions purposely this year, as the varieties are becoming so well known that it is with us not a question of selling, but of growing enough stock to fill our orders. We have a competent landscape architect whom we will be glad to have consult with you for a very reasonable fee if you desire his services.

Our entire business is given our own careful personal attention, but errors will naturally occur and we always take pleasure in rectifying them.

ORDER EARLY as possible as orders are filled in rotation.

NAME AND ADDRESS should be written plainly, giving Post Office, County, State or R. F. D. No. and nearest express and freight office.

SHIPPING DIRECTIONS should be given plainly and explicitly and if not so given we will use our best judgment in forwarding.

OUR TERMS are cash with order, unless by special agreement. C. O. D. orders should be accompanied by at least 25 per cent cash.

PACKING and boxes free.

REMITTANCES should be made by P. O. or Express Money Orders or by draft on Knoxville or New York. Cash sent through mails is at sender's risk. Make all remittances payable to Howell Nurseries.

OUR GUARANTEE is that every tree or plant will be in a perfectly healthy condition, true to name and up to grade and well packed when leaving our hands, after which all claims for loss or damage should be made to the forwarders.

TREES RESERVED for weeks or months after opening of shipping season should be paid for in full when ordered.

CLAIMS for errors of any kind should be made promptly within 5 days from receipt of goods. Our responsibility ceases when the trees or plants leave our possession as we cannot be held responsible for failures arising from defective planting or subsequent faulty treatment or cultivation or lack of attention and cultivation or for unfavorable weather conditions, insect depredations, etc. We exercise the greatest care to have our trees and plants true to name, well grown and well packed when they leave our possession, and if they are not accepted under these terms and conditions they must be returned to us at once and we will return the price paid therefor. If any variety accidentally proves untrue to label we will replace it or refund the amount paid therefor but it is mutually agreed that we shall in no case be liable for any greater sum than the original cost.

THE SHIPPING SEASON usually begins about the 15th of October and open ground stock can be shipped continuously till about the 15th of March. Entomologist's certificate accompanies each shipment to insure immunity from insects and diseases. We fumigate our stock with Hydrocyanic acid gas before shipping as required by the state law, so that insurance from insects and diseases is made doubly sure.

We have many new and rare varieties that we are testing and if they prove satisfactory we will add materially to our list next year.

The supply of the choicest fancy evergreens has run so low in the United States that it is almost impossible to buy a first class selection now, but we have a very large amount of them that will be ready to offer in one and two more years when we aim to have all of the standard and all of the new and rare varieties in sufficient quantity to meet all demands thereafter.

Again thanking you, we append our list.

# HEDGE PLANTS

We have a very large and fine stock again this year, and the demand is very heavy.

Nothing enhances the appearance of a place more than a well-kept hedge. We have them for every purpose.

Evergreen Amoor River Privet.....	18-24	3 00	—100

Baby Rambler Rose .....	1 yr.	12 50	—100

# DECIDUOUS TREES

Our stock of these is particularly good this year, especially of the Norway Maple, which we consider the best shade tree for this section. Our Sugar Maples are also extra good in all sizes, as are also the Elms and most of the other items in smaller quantities.

## Coniferous Evergreen Trees and Shrubs

You will note that our sizes are principally small and medium in this section. Our unprecedented demand the past year took our large ones, but we have added many varieties of merit, many of which we do not offer at all this year. We will have many thousand trees to offer next year of good medium sizes in about 250 varieties. This will be one of our leading specialties.

## FRUIT TREES, VINES AND PLANTS

We only offer what we have tried and found successful in this section. Our list is not large nor our claims extravagant, but when you buy from this list you get what you order and get good, well-grown stock. We do not grow fruit trees, but buy them from the most reliable grower in this country.
